

工作
項目

1. Rebuild box making machine and make electrical control box.
2. Install automatic packing equipment and modify hardware.
3. Troubleshoot the electrical control circuit.

內容
摘要

In order to improve human resources in our department, so we decided to have automatic packing equipment to reduce human resources day and night and also with less error, which means we can save money for our department. Our job is to install the equipment and make it run smoothly, sometimes need to modify something such as program or hardware.

實習
成果

Automatic packing machine can do more job such as pick up rolls into box, tape box, weight the product, stack on the pallet and it also know how to reject bad product.
